

When two equal minds meet, great things can happen

Eight years after its foundation, Green Development Foundation boasts a solid position in today's sustainable coffee market. It is an achievement that we have realised thanks to our great efforts and supplying quality and expert service. Our other programmes are also developing at great speed.

So it is time for the next step... namely to integrate the services of Green Development in Solidaridad. Green Development's expertise is mostly focused on the producer side of the coffee chain, while Solidaridad boasts great market expertise and experience. This makes our organisations compliment each other perfectly. By combining this experience, we can create the perfect chain approach.

For you as customer, roaster, producer organisation, financier or co-operation partner, this also offers new opportunities. We guarantee that the Green Development working method, quality and atmosphere will be continued within Solidaridad. We view the future of our programmes with great enthusiasm and confidence.

And of course we hope that you will join us in our move to Solidaridad. If you have any questions about the transition of programmes or other matters, please do not hesitate to contact us.

Rodney Nikkels, Director Green Development Foundation:

The decision was recently made to integrate Green Development's activities into Solidaridad's activities. The two organisations share the same objective, namely improving the income situation of small-scale producers in development countries, complimenting each other as regards market expertise.

Combining the organisations' activities is a logical step.

Hans Perk, Coordinator Unit Sustainable Coffee:

Solidaridad and Green Development are two entrepreneurial development organisations. They have been cooperating for years in the Coffee Programme to improve market access for coffee producers, for instance by developing new certification initiatives, the promotion of sustainable coffee and matchmaking. By integrating Green Development we are able to further improve our service to coffee farmers and roasters and to contribute to creating a sustainable coffee market for everyone.
